AVZ FFX LLL

That *should* be the right one I think MB but the current interested party on the CAMI website is Comminiere

As per this

Might not be a bad thing as it can open the way for the full 221 Carre of the Manono tenement to ultimately be recognised correctly with Dathcom as the interested party (no longer split into north and south as per the corrupt actions of Mupande)

The one thing that bothers meand has for ages....is that none of the information I have seen (irrespective of the interested party noted) includes "Tin" or "Cassiterite"

I really don't get that bit...

Hey can someone who has taken screenshots of the cami portal or a sharp memory check it out again.
Looks to me like it's changed again.
Cant find mention of Manono Lithium on it today and area looks to have changed again on 13359.
Was updated the 22nd apparently.

TDITD said: ↗

Multiple results, click on 'Application 15775'

Carlos Replied

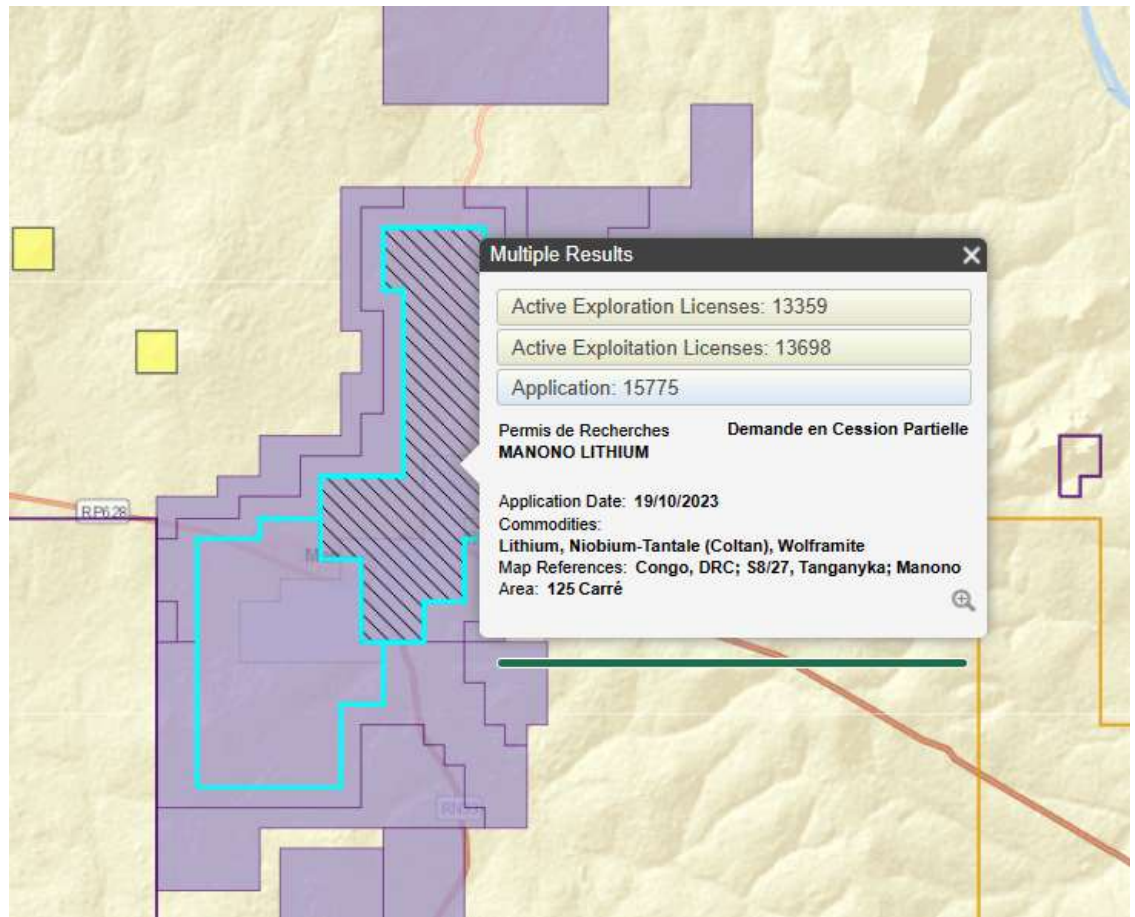

Defo still there

Marksmann007

Ok so it is when using 15775 in the search bar it's still there. When I put in 13359 and check out the surround tenements it doesn't show Manono lithium.

Remark

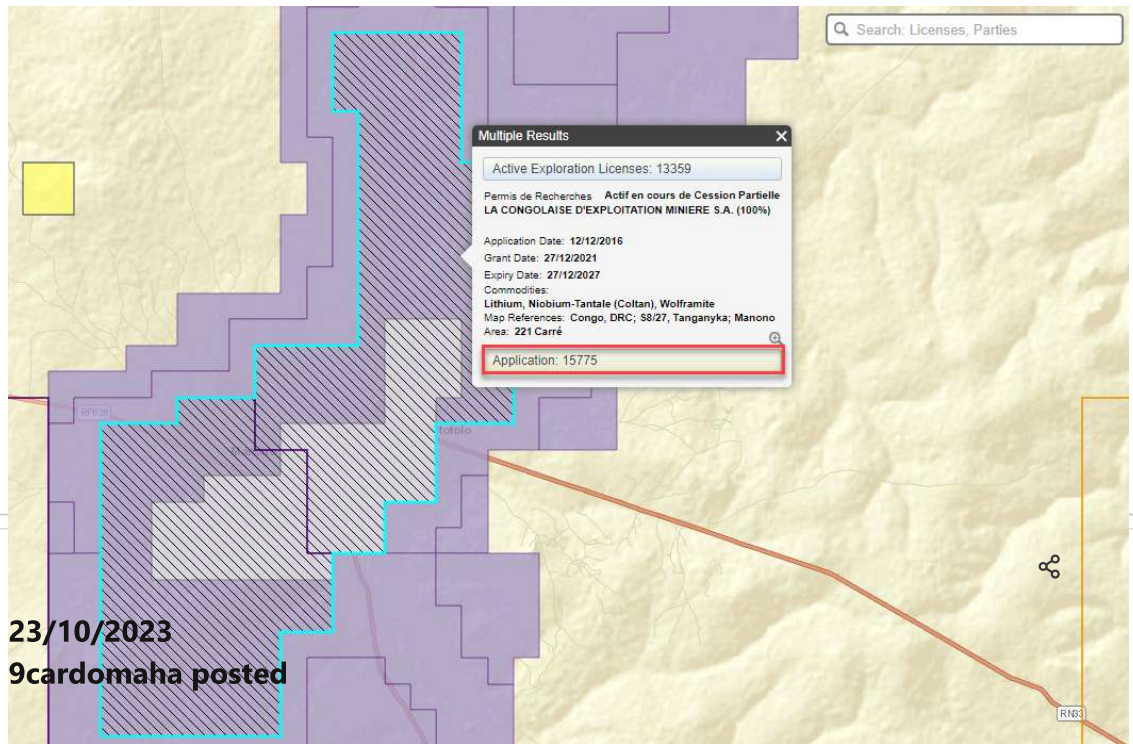

Scoota30

Did you use the search bar for 13359? If you click on the northern section it shows 13359 laying over the top of the new application - you may need to click the application in order to open that one up

Franck Fwamba hearing proposed Nth split of "our" PR13359 to "Manono Lithium" is Chinese.

Outcast 24 @NorthOutcast · 9h
 Its Zijin (under the subsidiary JING XANG) and Cominiere who established the JV Manono Lithium. It is a 39/61 split in favour of ZJ - the tenement is 125 carres carved out of PR13359 and applied for under a new PR 15775.
 It is NOT a PR yet.
 The opinions and research I share are my own and I am not licensed. External links are not recommended. To be safe, conduct your own research or seek advice from a licensed financial advisor.
 It is ONLY a application submitted to CAMI as Demand (or Request) to split (or divide) PR13359. And CAMI has assigned this application a number "Application 15775".

ICC be damned because part of the deal is Zijin withdrawing their claim on 15% of Dathcom and using the 33.4m to pay Cominiere for the north. Unless they are trying to get that 15% for free now. This was the exact terms of the original offer by Zijin.

'According to the joint venture agreement signed by Jinxiang Lithium and COMINIERE, after the Project Company acquires the exploration rights numbered PR15775, COMINIERE agrees to directly deduct the purchase price of USD 33.44 million for the 15% equity in Dathcom from the amount payable by Jinxiang Lithium to obtain a 61% equity interest in the Project

So they want a refund on the 15% from Dathcom and then use it to get 61% of 125 carres?

Fun fact Zijin brought the ICC case and can drop it anytime they want. And the MoU deal will lead to the dropping of all litigation against the DRC and its controlled entities so that means no Cominiere ICC case. Relevant disputes refers to control of Mpiana Mwanga imo

Manono lithium mine shuffle,Zijin Mining receives equity rebalancing

Walking Stone2023-10-24

lithium mine Manono Northeast Project. It is understood, Manono lithium mine PR13359 exploration rights have been returned and registered to Cominiere (Congo Mining Development Corporation) under one's name. According to the joint venture agreement between Zijin and Cominiere, **The two parties hold the northeast part of** the exploration right through Manono Lithium. (Exploration Rights No. PR15775), Among them, [Zijin Mining](#) holds 61% of the equity of the joint venture, Cominiere holds 39% interest.

[It was noted that Zijin Mining, which](#) has always been strict in information disclosure, used the following words in its announcement: "Northeast part of the mining rights project", rather than the Northeast "A certain project". alert immediately, Mining rights were split! Some friends in the industry asked about this on WeChat, I took some time out from my busy schedule to type out a few paragraphs of text..

1-Significant reshuffle and division of mining rights. The original PR13359 was split into two, Cominiere acquires flagship resource area, Zijin obtains the best prospect exploration area in Northeast China.

The original outer exploration rights of Manono's northeast extension and southwest extension were randomly cut up, Congolese environmental and mining consultancy to divide outer extension; AVZ only retains the external extensions after castration, And its mineral rights are surrounded by exploration blocks of the Congolese Environmental and Mining Consulting Company.

The two pictures above reflect the aftermath of the Manono incident, The mysterious operation of mineral rights changes in core areas. The original PR13359 was split into new PR13359 and PR15775, The former is owned by Cominiere, The latter is controlled and dominated by [Zijin Mining](#) through cooperative companies. The original peripheral PR4029 and PR4030 were cannibalized and divided., AVZ currently holds only the yellow area in the picture above, Congolese environmental and mining consultancy holds green zone.

2- The flagship mining right PR13359 was taken back by the government, The discovered core lithium resources are fully controlled by Cominiere.

Although the project is called Manono, However, the resources discovered by AVZ exploration are actually in the Kitotolo Pegmatite Belt., rather than the Manono pegmatite belt. Areas where AVZ has carried out extensive exploration discoveries and submitted resource estimates in the past, Strictly limited to the lower left corner of the picture below, That is, in the Roche Dure pegmatite in the southwest area, The

<i>Carriere de l'Este</i>	250.9m @ 1.48% Li ₂ O, 913ppm Sn	MO17DD007

Learn more about The Stock Exchange Forum and why you should consider free membership.

constructed as early as 2017 discovered ore thickness of up to 251 meters in the Carriere de l'Este pegmatite in the Manono pegmatite belt.,Li₂O grade is as high as 1.48%,Mineralization at 913 ppm tin grade.

3- Zijin Mining's previous deal to purchase 15% of Dathcom's shares was completed"reconciliation",The acquisition price of US\$33.44 million was directly used to obtain 61% of the equity consideration of the PR15775 exploration rights project company..**Zijin Mining becomes one of the foreign-funded enterprises that invested in the original Manono project,So far the only company that has received equity rebalancing.**

4-Commentary and analysis of future trends of the Manono lithium mine incident:

^{1 users}
Zijin Mining has occupied the mining news attention of Chinese people for nearly two months.,First, PNG's Porgera gold mine won new mining rights,Then the investment in the Manono lithium mine project was rebalanced and equity repaid,Demonstrate the ability of large international mining companies to respond to and resolve national risks.
