Hi Kate not sure if The West is interested but above link to "The Stock Exchange Forum" has some interesting information. AVZ minerals this week have released official ASX shareholder updates prompted by the chinese backed nomination of 3 new directors to the AVZ board from Fat Tail holdings. Tommy Richardson from the AFR also seems to be complicit in this whole sordid affair having published several articles full of half truths and innuendo over the past 12 months or so to the detriment of AVZ

AVZ is a W.A.based ASX listed company and has many shareholders here in the west including myself

Cheers
